I'm a .NET Developer with over 6 years of experience in building data-centric applications and reporting tools. Skilled in C#, .NET Framework, data visualization and integration. Currently updating technical expertise, eager to contribute to a collaborative development team.
Legally authorized to work in Poland.

Technical Skills

C#, .NET Framework/Core, LINQ, SQL, Syncfusion, HTTP APIs, JavaScript, jQuery, Angular, Unit Testing, Git, Excel automation.

Work Experience

.NET Developer at OmegaSoftware (March 2014 – parental leave since July 2021)

As part of a development team, I contributed to building a universal platform for analyzing, reporting, and visualizing advertising campaigns.

- Implemented data import/export pipelines from various file formats using C# and Syncfusion libraries.
- Developed advanced Excel reports with complex features (links, formulas, sheets).
- Designed and optimized data visualizations using tables and charts.
- Automated data exchange via APIs, increasing efficiency and reducing manual work.
- Implemented unit tests to ensure system reliability.
- Communicated with clients to clarify requirements and develop optimal solutions.

Career Break (July 2021 – Present)

Since July 2021, I have been engaged in the most challenging and responsible project – raising a child. This experience has strengthened my soft skills, including adaptability, time management, communication, and prioritization. Recently, I'm refreshing my skills to re-enter the workforce:

- Completed Coursera courses to refresh and expand .NET knowledge.
- Developed a small website to share my CV and practice with Docker.
- Practiced algorithmic and problem-solving tasks.

Additional Interests
- Solving detective games & logic puzzles
- Creative cooking & experimenting with recipes

Certifications

Exam 70-483: Programming in C#. Microsoft Certification – Pearson VUE (Online), January 2021

Education

Belarusian State University of Informatics and Radioelectronics – B.Sc. in Computer Science (2015)
